Buying Testimony

(CONT. FROM PAGE 1)

against these practices by USDA have been snowed.

Recently the House Agriculture Committee tacked an amendment on the Agricultural Appropriations bill specifically prohibiting this kind of spending by USDA. However, this amendment was lost in the Senate House conference Committee.

This week another organization joined the forces of those complaining about these methods. President John B. Armstrong of the Texas and Southwestern Cattle Raisers Assn., representing 14,000 cattle producers, spoke out against the use of Federal funds to pay for testimony from groups or individuals favorable to USDA views. (See story in Column 1).

Armstrong suggested more hearings be held in various parts of the country to enable individuals concerned to appear in greater numbers and thus obtain more grass roots opinion concerning new rules and regulations. This procedure could prevent mistakes created by a lack of sufficient study and understanding of the problems and their impact. Armstrong pointed to the beef grading proposals and brucella regulations as examples. Just recently Dr. Donald Kennedy, head of the Food & Drug Administration, announced there would be a delay in FDA's proposed rules banning use of low level antibiotics in livestock and poultry rations and stated the reason for his action was facts he learned at three meetings in various parts of the country which brought him greater insight into the problem. Facts uncovered in these grass roots meetings served to change FDA's thinking on the impact the proposed ban would bring about.

Currently the USDA's proposals to ban use of nitrites in meat products has created a similar controversy. Congressman William C. Wampler of West Virginia and James G. Martin of North Carolina recently introduced legislation which would prohibit the Secretary of Agriculture from taking any action to ban nitrites until three months after the saccharin study is completed. The Congress halted FDA-USA plans to ban saccharin as a food additive until conclusive tests as to the real, instead of "possible", dangers had been established.

USDA recently released a typical "scare" news release charging that a recent study by Massachusetts Institute of Technology indicated nitrites were possibly carcinogenic. USDA promptly stated that 20% of the nitrites ingested by humans come from those used as additives in meat products. Some 80% of the nitrites in the human system originate from natural manufacture of them from green and

Selling will be 300 lots including 185 pairs with fall and spring calves at side; 75 bred heifers; 21 open heifers, 50 coming 2-year-old bulls and six herd bulls. The McGuirk Herefords feature 07 Tiberius breeding.

Owner LeRoy McGuirk said, "After a long and timely search for a line of cattle that could change and improve the body type and performance of our cattle, we settled on Tiberius. One of the many strong points of the 07 Tiberius is the line-breeding program used for a number of years by R. K. Field, making the Tiberius one of the most genetically potent lines of cattle available today. The Tiberius also have exceptionally large frame size which is ideal in the current trend for greater body type scores."

One thing everybody, except Taxers and those like Big Labor who enjoy the fruits of Big Spendin' by Govt., are in agreement on is that too much money is wasted by all Govt. and it has finally dawned on just about everyone that that is money that could be more pleasurably squandered by you & me.
One of th' brighter spots in th' wake of Proposition 13 is th' fact that a lot of people are gettin' interested in not th' cut off of some of th' cancerous financial growth that th' politicians seem to be able to operate on. Some very thoughtful people, among 'em Senator Muskie, advocate termination of a lot of federal programs that hang in there despite th' fact they are useless and ineffective.
Th' callous manner in which our

money is thrown around is evident anywhere you look. A good example is th' practice of mandating jobs for politicians or bureaucrats where previously no such job existed. A good example was th' action of President Carter in making a \$50,000 per year job for Former GSA Administrator Griffin. GSA was riddled with incompetence and outright dishonesty and theft but Griffin seemed less than greatly disturbed. He's a bosom pal of House Speaker O'Neill put Griffin in a strong position and Carter made amends by creating a job under Bob Strauss for him. This was not unique; it goes on all th' time and it costs money. For years th' Congress and th' Administrations past have kept programs, committees and boards alive and well, some of which have not done any thing as far

back as anyone can remember.
Th' flip over th' now Senate office Bldg. and th' extra money lavished on it, is a typical waste of money. Your money and my money, if you think th' Senate is trouble in this, you just aint been payin' th' spendin' at City, County & State but as long as th' National Committee has a free hand to enjoy th' wild life, much more there. Of course, I ain't th' Administration on this but I can find a way to handle Congress real, gunwino HERE and we hope he and Sen. Muskie will not do a lawk this over soon. Muskie wrote git that Sunset law on th' books, who would make each of th' th' Bldg. parimints in Govt. justly be cut off every so often. But th' too much sense to expect Congress cuddle up to that idea!
Ever thing,
The Editor

P. S.: Uncle Dunk notes where ladies in Lubbock, Texas, have a new Pressure Group known as G.A.S.P., or Group Against Sex Pollution. This outfit plans to make illegal to smoke anywhere except th' barn and Dunk figures he be long before we will have all groups who want to outlaw out boots, Levi's, stretch pants a pants, and they'll probably wash anions, garlic and Brut and Dunk likes th' quote from a lady who lists th' three most common: 1. the check is in the mail, I put the office and 3. I'm from Vegas and I'm here to help you! Dunk's toughest task th' Burrocola L.L.C. cians face today is convinced that that they know what's best for findin' some way to make sure and shut up! Meat Animal Research Center To Build Purebred Pinzgauer Herd For Crossbreeding

Clay Center, Neb. — The U.S. Meat Animal Research Center here will build a purebred herd of Pinzgauer cattle to be maintained as a control group in conjunction with its 20-year studies of crossbreeding for lean meat, crossbreeding for general purpose, and crossbreeding for maternal characteristics.

The announcement was made by Dr. Larry V. Gaudiff, who is the Research Leader, Genetics and Breeding, at the U.S. MARC, to a large group of Pinzgauer enthusiasts, including 65 visitors from overseas, during the International Pinzgauer Breeders Field Day here July 21. Overseas guests representing Austria, Italy, England, Republic of South Africa, Iran and New Zealand were accompanied by large delegations from the U.S. and Canada at the field day.

The group toured the facilities of the vast research station which covers 3500 acres of deeded and 2000 acres of leased land. Of primary interest were

the pastures and pens where the Pinzgauers are used in crossbreeding experiments. Results of projects there so far were reported to the group, and showed that ZPinzgauer have been leaders in most of the economically important traits.

In making his report, Dr. Gaudiff reported that 40 percent of the cattle in the United States are crossbred and it is with crossbred cattle that the fastest gains can be made toward more efficient meat production.

Many of the Field Day visitors had already attended Pinzgauer Field days in Canada and at the Wyoming Pinzgauer Ranch at Sheridan; then went on to another Pinzgauer Field Day at Red River Farms, Gallatin, Tenn., July 22.

Pinzgauer People Plan Busy Fall Show-Sale Season

The Southwest and Southeast Regions of American Pinzgauer Assn. have planned a busy show-sale schedule for the fall.

First will be the Southwest Region's show and sale at the Louisiana State Fair at Shreveport, the show at 10 a.m., Oct. 28 with a full slate of percentage and purebred classes showing, and the sale at 7 p.m., Oct. 28, with an offering that will include many of the top

Canadian Pinzgauer Cattle Co., Oida, Alta., sold a percentage female, Miss SR 12H, to Falsouse Pinzgauer Breeds, Colfax, Wash., for \$4500, then donated the proceeds to the Canadian Pinzgauer Assn.

According to Fred Brechtel, chairman of the Pinzgauer Congress, the Pinzgauer breed is growing rapidly in North America, and the results of that sale bolstered his comments that the USA is the principal market for Canadian Pinzgauer cattle.

Darrel Coleman, right, of Coleman's Pinzgauer Farm, Bloomdale, Mo., exhibited this five-year-old cow, Maggie PEF 20, to the reserve grand championship of the recent International Pinzgauer Congress show at Calgary, Alta. She also received the honorable top Bavarian cow award. The buller is Bruce Buechner, Wynnewood, Okla., and at center is Dr. Gerhard Holz, general manager of the International Pinzgauer Cattle Congress Breeding Assn. The grand champion female of the show was Toronto PEF 72 owned by Norman Conrad of Oida, Alta. Coleman's Pinzgauer Farm also had the Junior champion female with Al-Mar Queen PEF 1000112.

animals from the show, said Dick Kellett, Azle, Texas, Show and Sale chairman. Entries for the Southwest show close Sept. 1.

Gary Arnold, Jefferson, Texas, who is in charge of entertainment and related activities for the Southwest Region's show and sale, is making plans for a poolside barbecue and a visit to the Louisiana Hay Ride show.

The next show and sale will be the Southeast Region's at the New American Livestock Exposition at Louisville, Ky., which runs Nov. 1 through 17. Both the Pinzgauer show and sale will be held on Nov. 13, the show that morning and the sale that night.

However, before those shows and sales, another activity of the Southwest Region will be the first Pinzgauer display of live animals and an information booth at the New Mexico State Fair Sept. 15 through 24. Kellett's K Bar L Pinzgauers, Jim and Mary Jane Conner's Pyramid Ranch at Anna, and Frank Terry of Edinburg are planning and will operate that display.

Then the National Pinzgauer show and sale will be held in Fort Worth during the 1979 Southwestern Exposition and Fat Stock Show.

Champions Named At Angus Futurity

More than 1800 top Angus breeders

from over 40 states and foreign countries waited impatiently Aug. 8 to learn which animal is Supreme in the breed. It was PS Princess 60E 117, (8/14/77), a female Angus owned by Gladys Farms of Maysville, Missouri, and Pan State University. She was named number one in the breed during the All American Angus Futurity being held at the Kentucky Fair and Exposition Center in Louisville.

Chairman of the All American Angus Futurity, Tom Burke, said that the Supreme Champion of the show is the highest honor that can be bestowed on any animal in the breed. The choice for Supreme Champion is made after male and female Grand Champions have been named. One of those two top males is judged Supreme Champion male. Burke, himself a well-known Angus breeder, said that a Grand Champion female has been named Supreme Champion female more than six times in the thirty-one year history of the Futurity. "Both animals are exceptional of the year," he concluded.

AVOID CHANGING WELL LEATHERS FOR MANY YEARS
Perma-cups are molded urethane, more wear resistant than nylon. Perma-cups will outlast leathers 10 to 1. Their tapered design allows only 1/8" wearing, instead of 5/8" of a leather. Much less friction for easier pumping extends cylinder life greatly. Perma-cups must be used in a good or new cylinder, as they do not avail. Install Urethane Perma-cups, Urethane Check-balls, and Urethane Pump Rod-guides, and don't pull that well for many years. Thousands are in wells that have not been retapped in 3 years! All are available in standard cylinder and pipe sizes. Write or call for our catalog. We ship same day order is received. This is our 20th year serving ranchers.
